

BETH HALLIWELL

Job: Producer

Company: Code Computer Love

I work on the delivery of work in my product team, aiding the Project Manager, Product Owner and Testers to ensure the progress of the projects we're working on, encourage the flow of work and maintain the clients happiness

Organised

Determined

Powerhouse

The skills I use most in my job...Communication

- Leadership
- Organisation

The most interesting thing I've worked on in my career so far...Working with a client on a long term basis with a project that is constantly evolving

What inspired me into digital and tech...I acknowledged this field as the one that would work best for me and that I would work best for. It's an area I'm very passionate about

My educational background is...I did a Digital Media and Communications course at MMU and attended events and got out and spoke to people in the field

What advice I'd give to girls thinking about a career in digital and tech...Get out there and speak to other women in tech. The media portrays this field as one big group of guys sat in a basement typing in a language you don't and can't understand. Trust me when I tell you that women in digital are essential to it's survival and growth.
