CATHERINE ARNOLD

Job: Graduate Java Developer

Company: MoneySuperMarket

I am part of a team which develops services related to the provider side of the service.

Happy	Enthusiastic	Crazy

The skills I use most in my job... Teamwork
• Communication

The most interesting thing I've worked on in my career so far... Not long started so I am yet to do many exciting things.

What inspired me into digital and tech...I saw it was one of the biggest growing and one of the most interesting industries so wanted to be part of the change.

My educational background is...I studied computing games programming at university, this provided me with transferable skills such as programming to push myself in a different sector of the development and tech world.

What advice I'd give to girls thinking about a career in digital and tech... Dont worry about what others think about what you want to do. If you want to do it then go for it because at the end of the day you are the person who has to do that job not them.
