ELERI EDWARDS

Job: Software Engineer

Company: DAI

Using software development tools I design, implement and manage large scale logistic operations for customer warehouses.

Lively	A team player	Spontaneous

The skills I use most in my job...C programming and Linux command line

• Integrate end-to-end messaging with external systems, using web services, gsoap and XML

• Problem solving, logic, and optimisation

• Develop customer rapport, critical analysis, and open communication

The most interesting thing I've worked on in my career so far... Commissioning a new warehouse onsite in Poland. Supporting the operators and managers and ensuring the Go Live was a success.

What inspired me into digital and tech...I love reading sci-fi, and wanted to be a player in making the science and tech of the future closer to today's reality.

My educational background is... Bachelor of IT (Software Information Systems) and Bachelor of Arts (Writing) in Australia

What advice I'd give to girls thinking about a career in digital and tech... Engineering at its core is about causing change and improvement to quality of life. It's a hugely creative industry.
