

HANNAH BROWN

Job: Software Developer

Company: Auto Trader UK

I work within the team responsible for producing vehicle valuations and metrics on our website. As part of my role, I look after the data we use to train our models. I also create and maintain apps which we use to serve the metrics internally and externally.

Curious

Determined

Ambitious

The skills I use most in my job... Problem Solving

- Programming languages such as java and kotlin
- Pair Programming
- Testing and Debugging

- Communication Skills

The most interesting thing I've worked on in my career so far... Predicting the value of a car for a date in the future.

What inspired me into digital and tech... I wanted a job with lots of variety and where I could use my brain to solve problems. A housemate at university was doing computer science and suggested I try it.

My educational background is... I studied maths at university and did one programming module which I struggled with. I then found enjoyed using Java and applied for a graduate scheme with Auto Trader which has helped me develop my skills further.

What advice I'd give to girls thinking about a career in digital and tech... A willingness to learn is all you need to thrive. There's a role for everyone and lots of variety within each role.
