The most interesting thing I've worked on in my career so far...I was lucky enough to work in India and Malaysia as part of a large Asian software implementation

What inspired me into digital and tech...It was almost accidental but there are so many varied opportunities and roles there is something for everyone!

My educational background is...Very little! I left college part way through A-levels and went to work

instead, I've worked through various roles to get here!

What advice I'd give to girls thinking about a career in digital and tech... Go for it! We need more balance in this sector and women add such a valuable presence. Do your homework find your ideal role.
