

JADE PARKINSON-HILL

Job: Founder

Company: Steam School

I am the founder of Steam School. We broadcast interviews into schools every week with inspirational people from the worlds of science, tech and digital media.

Creative

Loyal

Brave

The skills I use most in my job...Marketing and relationship building

The most interesting thing I've worked on in my career so far...I created a school for teenagers who wanted to get into video games.

What inspired me into digital and tech...I started my career in tech after leaving University. Throughout my career i have worked with some amazing entrepreneurs who either provided me with great opportunities in tech or supported education projects whilst I worked in schools. All of these entrepreneurs gave me the confidence and inspiration to start my own business.

My educational background is...Masters and life long learner. I believe we should learn something new everyday.

What advice I'd give to girls thinking about a career in digital and tech... Start now, learn to code, even at a basic level, explore digital creativity projects and build a portfolio of fantastic projects to show a future employer.
