

KATE

Job: Strategy Leader

Company: Government Communications

I explore new and exciting opportunities with technology, people and partnerships. My company helps keep Britain safe and secure, and my daily work contributes to the future of that mission.

Passionate

Adaptable

Enthusiastic

The skills I use most in my job...Problem Solving

- Supporting People
- Creativity

The most interesting thing I've worked on in my career so far...Leading global teams to deliver a programme of transformational new applications across the globe (Japan, America and Europe).

What inspired me into digital and tech...I love solving problems, and working with the latest gadgets. I thrive when working in a team, building a close-knit family who are all dedicated to completing a challenge.

My educational background is...At college I studied Further Maths, Physics and Computing, and enjoyed Drama and Music in my spare time. I studied Computer Science at Oxford University.

What advice I'd give to girls thinking about a career in digital and tech...Careers in digital/tech don't mean sitting at a computer every day. There are lots of opportunities to be creative in designing new systems, to travel, to learn new things, to build new friendships, and to contribute to important business and marketing decisions. STEM subjects give you extra tools and perspectives that can help you in your professional and personal life.
