LISA PATEL

Job: Front End Developer

Company: Code Computerlove

At Code I am part of a product team that creates solutions to problems through UX, design and code. I predominantly code using front end languages that bring to life the designs of a digital piece.

Real Role Model

Energetic	Happy	Enthusiastic

The skills I use most in my job...CSS

- JavaScript
- Problem solving
- Working with others

The most interesting thing I've worked on in my career so far... For me it was being part of a pitch process for a new client. I stepped out of my comfort zone to talk about how

What inspired me into digital and tech... The digital industry had started to pick up pace and I wanted to be a part of where it was going.

My educational background is...I studied BSc Media Production at university which only had a small element of coding in one module. I gained places on internships learning from others and learning from online tools.

What advice I'd give to girls thinking about a career in digital and tech... Go for it. Everyday you are learning and growing. It's really exciting when you find a solution to a problem or a challenge and when you all work together too.
