INSPIRE & EMPOWER

LIZ BOOTH

Job: Senior Developer

Company: Buffalo 7

Create presentations for individuals and companies, conduct presentation training sessions and workshops.

Practical	Confident	Creative

The skills I use most in my job...UX design
• Motion design
• Presenting
• Teaching/training

The most interesting thing I've worked on in my career so far... Planning and hosting a 3 day festival of art, theatre and music for young people at the Tate Liverpool

What inspired me into digital and tech...A new role to apply my creative problem solving to, whilst helping people achieve what they dreamed of

My educational background is... Fine Art degree at MMU, worked as an art technician in a high school and young persons programme co-ordinator at Tate - organising and creating valuable products and experiences for young people to learn creatively

What advice I'd give to girls thinking about a career in digital and tech... There's a good platform for girls to not only achieve a career in a masculine dominated industry but to excel at it. New jobs are constantly being created, you can make it what you want.
