The skills I use most in my job... Coding

- Learning
- Problem solving
- Communication
- Creative thinking

The most interesting thing I've worked on in my career so far... I am a music enthusiast. I had the opportunity to build an app that composes classical music using music theory and mathematics. Extensive research and testing led to a gratifying outcome. Additionally, working in various countries

and immersing myself in different cultures has been a career highlight for me.

What inspired me into digital and tech...I'm passionate about creating and design, which led me to study computer science for website design. Along the way, I discovered my love for programming. The digital and tech realm offers countless opportunities to create impactful, innovative solutions, making it an exciting career choice.

My educational background is...Computer science :) I did a Bsc in Computer science and then a MSc in computer programming

What advice I'd give to girls thinking about a career in digital and tech...Tech and programming may seem daunting, but don't be discouraged. If you have an interest, go for it and stay confident! The world of programming and tech is filled with wonders and endless possibilities.
