

NINA MARIJKE DAVIES

Job: Developer

Company: MoneySuperMarket

Frontend Developer who works mainly in Javascript, and looks after the Home Insurance section of our website

Professional

Marvellous

Helpful

The skills I use most in my job...Adaptability

- HTML/CSS skills
- Frontend framework skills
- Command line skills

The most interesting thing I've worked on in my career so far...Worked on implementing a new feedback tab across our whole site, which has been interesting to read the resulting comments/feedback!

What inspired me into digital and tech...I have always loved gaming and computing since a very early age, and the new generation of consoles and the joy that brings to people inspired me to give up

my previous job (in pharmacy) and go learn what I really loved, computer science!

My educational background is... Studied Computer Games Development at Glyndwr University (as the only female in the class!) which was a fantastic experience for me, really helped bolster my technical / computer skills overall!

What advice I'd give to girls thinking about a career in digital and tech... You can, and will be amazing in tech. Don't let any presumptions you may have stop you doing it if it's what you enjoy! I expected to face a lot of adversity being the only female, but my experience was anything but! And made me a far more resilient person!
