

RUTH

Job: Developer

Company: C-21

Build elegant and rapid frameworks and applications for a variety of incredible clients

Driven

Motivated

Organised

The skills I use most in my job...SASS

- PHP
- VUE
- React

The most interesting thing I've worked on in my career so far...Building my own mobile application to help paramedics on the road get quick answers to common definitions and abbreviations

What inspired me into digital and tech...My dad bought me an Amiga 2000 when I was young, and that had me hooked on tech ever since!

My educational background is...I am actually self-taught, as I felt University wasn't for me! I began as a designer/illustrator but was frustrated when developers weren't coding the designs up pixel perfect, so I taught myself.

What advice I'd give to girls thinking about a career in digital and tech...It's such a creative environment with so many different aspects. There are so many courses available and gender is not a blocker to get where you want to be!
