

SHARON JONES

Job: Analyst Developer

Company: Salford Royal Foundation Hospital

I am a writer of reports using SSRS and system developer using medical logic language

inspirational

professional

The skills I use most in my job...Listening

- Communication and common sense

The most interesting thing I've worked on in my career so far...The Emergency Department Transformation project.

What inspired me into digital and tech...Was not inspired as just, really drifted that way.

My educational background is...I did not do great at school, but once I found I had a love of computers, particularlyly databases, I worked hard to achieve, a degree at 42 years of age.

What advice I'd give to girls thinking about a career in digital and tech...Just go for it, you natural talent will just shine through. Its more that spreadsheets!
