

STACEY TAURAH

Job: Senior Agile Delivery Lead

Company: Nimble Approach

I work with businesses to help them become more effective in delivering to the customer. A big focus is on learning and using this to move forward. A lot of the 'doing' is underpinned by culture, and I try and help people understand how to let this thrive.

Personable

Creative

Passionate

The skills I use most in my job...Coaching

- Teaching and Mentoring
- Facilitation
- Stakeholder management
- Listening

The most interesting thing I've worked on in my career so far...It's hard to choose just one moment as each brings its Moments of 'Wow'. But I think it's the transition to the role I'm in now with it being a consultancy, the pace at which there are opportunities to learn and teach are vast and it makes each day interesting.

What inspired me into digital and tech...Problem solving - I enjoy helping people reach their goals and what better way than with technology. This field is growing rapidly which means loads of opportunities for reflection, change and improvement. I've also had some great female role models too :)

My educational background is...I have a degree in Forensic science and specialised as a DNA expert for 7 years, I then began testing our systems to aid with movement forwards from a software perspective and came across testing - scrum - Agile And now here we are.

What advice I'd give to girls thinking about a career in digital and tech...Understand what you want to achieve and will the role get you there? Ultimately research the role and try it. You won't know until you dive in. Stereotypes are changing so don't ever let this stop you. There are plenty of us on hand to help and guide and mentor.
