

STEPH JENKINS

Job: QA Engineer

Company: Gecko

I spend time exploring, detecting, investigating, questioning, gathering evidence, creating and telling stories, and delivering feedback to help the team develop quality products

sparkly

kind

friendly

The skills I use most in my job...Questioning

- Report writing
- Investigation
- Communication
- Curiosity

The most interesting thing I've worked on in my career so far...Bringing a new product to life and being involved in the different discussions that contributed towards the final product

What inspired me into digital and tech...A friend told me about her non standard journey into tech, she made me realise that I had been pigeon-holing myself. I'd always had an interest in technology and she helped me realise that this was something I could develop!

My educational background is...Standard GCSEs & A-Levels with a focus on Arts subjects. BA Politics, MA English, & most recently my ISTQB Software Testing certification

What advice I'd give to girls thinking about a career in digital and tech...Don't be put off by perceptions. The industry is far more welcoming, accessible, and inclusive than any other environment I've worked in. A career in digital or tech doesn't mean coding, there is a lot variety to be found!
