**The skills I use most in my job...**Leadership

- Intelligent Automation technology
- Business analysis
- Data analysis
- Stakeholder management

# Real Role Model

**The most interesting thing I've worked on in my career so far...**I have delivered numerous automation and digital transformation projects for banks. My most interesting role was leading the intelligent Automation centre of excellence team at a bank. The team used multiple technologies to automate 15 processes with a year saving millions for the organisation

**What inspired me into digital and tech...**From a very young age, I was interested in science. As a natural progression, I studied engineering and my first job was in technology. What I love about tech and digital is the opportunity to solve problems on a daily basis.

**My educational background is...**I'm an electronic and communication engineer with an executive leadership programme from Said business school, Oxford university

**What advice I'd give to girls thinking about a career in digital and tech...**It is a great career to be in. You get to solve diverse problems on a daily basis. It's a lovely experience to see the solutions you deliver, having real business & customer impact. You also get to work on the latest tools and technologies.
